Software QA Automation Engineer

Build38 is a cyber security start up that takes care of securing mobile apps. We enable all sorts of solution providers (from car manufactures to banks, from public transit operators to identity providers) to deliver their mobile use cases in a secure manner. We already protect millions of Android and iOS endpoints with our SDK which, together with our backend analytics platform, provides the most comprehensive mobile app security solution in the market.

Build38 is an international company, with the Head Quarters in Munich, a Sales office in Singapore and the tech hub in Barcelona.

We are looking a proactive, enthusiastic, and creative **Software QA Engineer** to integrate into our growing Agile teams. You will be responsible for designing and automating the testing environment at Build38.

In your day-to-day work, you will:

- Participate in translating High Level requirements into comprehensive behavioural scenarios.
- Implement and maintain the proposed scenarios.
- Establish testing culture as an integral part of the development
- Coordinate with the other QA teams to ensure cross-team alignment and avoid duplications
- Be involved in all phases of the development cycle (from Analysis to Delivery).
- Be accountable for delivering a valuable increment to the business in every sprint.
- Contribute to continuously improving your team's way of working.

You should have:

- Computer Science degree or similar.
- 2+ years' experience in the Quality Assurance or Quality Engineering domain at a software driven company
- 2+ years' experience understanding of QA methodologies and role of QA in software development lifecycle
- 2+ years' experience in creating a test plan and detailed test cases to achieve an efficient test coverage of the feature
- Understanding the basic concepts of object-oriented programming
- SQL basic knowledge
- Excellent communication, interpersonal, and team development skills; ability to interact with people of varying backgrounds, technical abilities, languages, and cultures; must be able to read and write effectively in English at a business-professional level
- Ability to adapt in a dynamic working environment, learn quickly and solve problems

- Ability to interpret technical and business objectives and needs
- Good attention to detail

What we can offer you:

- Optimized onboarding – for your optimal start and your customized induction.
- Enthusiastic team – waiting to help you succeed.
- Internationality – three locations worldwide with employees on 3 continents.
- Simplicity – because we like to make it easy and be practical.
- Green field – where you can explore and bring in your experience.
- Well-known customers – from the German and international economy.
- Beautiful office spaces in the heart of Munich and Barcelona – 200m to Marienplatz in Munich or the Sagrada Familia in Barcelona with regular team/community events (breakfast, lunch, beers…).
- Good transport connections – easy to reach by public transport.
- Attractive performance-based remuneration model – as motivation for YOUR motivation.
- Flexible working hours!

Tell us what excites you about security for mobile apps and what your passion and future plans are.

We want to get to know YOU and know who YOU are.
